Step 3: Once you click on the 'Conductor Location/Address' link the report parameters box will open. The easiest way for a county to find the organization(s), if any, playing in their jurisdiction is to select their county from the drop box and leave all other fields blank. The easiest way for a municipality to find the organization(s), if any, playing in their jurisdiction is to type in the name of their city and leave all other fields blank. If you would like to search based off organization name or playing location name that option is also available. (Figure below for Anderson County)

***Note:** The Charitable Bingo Operations Division processes hundreds of licenses every year and the list may change daily. Cities need to also take note of the 'City Limits' column within the report as some organizations playing location may have an address of a particular city, but are located outside that city's limits. The status date is the last status action the organization made to its license, and start date is when the license was originally issued.
