HUB SUBCONTRACTING PLAN (HSP)

In accordance with Texas Gov't Code §2161.252, the contracting agency has determined that subcontracting opportunities are probable under this contract. Therefore, all respondents, including State of Texas certified Historically Underutilized Businesses (HUBs) must complete and submit this State of Texas HUB Subcontracting Plan (HSP) with their response to the bid requisition (solicitation).

NOTE: Responses that do not include a completed HSP shall be rejected pursuant to Texas Gov't Code §2161.252(b).

The HUB Program promotes equal business opportunities for economically disadvantaged persons to contract with the State of Texas in accordance with the goals specified in the 2009 State of Texas Disparity Study. The statewide HUB goals defined in 34 Texas Administrative Code (TAC) §20.13 are:

- 11.2 percent for heavy construction other than building contracts,
- 21.1 percent for all building construction, including general contractors and operative builders contracts,
- 32.7 percent for all special trade construction contracts,
- 23.6 percent for professional services contracts,
- 24.6 percent for all other services contracts, and
- 21 percent for commodities contracts.

-- Agency Special Instructions/Additional Requirements --

In accordance with 34 TAC §20.14(d)(1)(D)(iii), a respondent (prime contractor) may demonstrate good faith effort to utilize Texas certified HUBs for its subcontracting opportunities if the total value of the respondent's subcontracts with Texas certified HUBs meets or exceeds the statewide HUB goal or the agency specific HUB goal, whichever is higher. When a respondent uses this method to demonstrate good faith effort, the respondent must identify the HUBs with which it will subcontract. If using existing contracts with Texas certified HUBs to satisfy this requirement, only contracts that have been in place for five years or less shall qualify for meeting the HUB goal. This limitation is designed to encourage vendor rotation as recommended by the 2009 Texas Disparity Study.

34 Texas Administrative Code, §20.14 requires all respondents (prime contractors) bidding on the contract to provide notice of each of their subcontracting opportunities to at least three (3) Texas certified HUBs (who work within the respective industry applicable to the subcontracting opportunity), and allow the HUBs at least seven (7) working days to respond to the notice prior to the respondent submitting its bid response to the contracting agency. In addition, the respondent must provide notice of each of its subcontracting opportunities to minority/women trade organizations or development centers at least seven (7) working days prior to submitting its bid response to the contracting agency.

We respectfully request that vendors interested in bidding on the subcontracting opportunity identified in **Section C** reply no later than the date and time identified in **Section C, Item 1**. Submit your response to the point-of-contact referenced in **Section A**.

Intellectual Property Counsel Statement of Work

Scope of Work

GTECH Printing Corporation requires intellectual property counsel to perform appropriate intellectual property searches (e.g., full copyright, trademark or service mark or patent searches) on behalf of the Texas Lottery Commission (TLC) for, e.g., lottery games or game themes, to evaluate whether proposed games may be protectable and do not infringe the intellectual property rights of any third party.

Scope of Work
Marketing Research
Web-Based Instant Concept Testing

PROJECT REQUIREMENTS

Description of Project

GPC desires to engage in a web-based quantitative market test of instant (“scratch”) ticket concept appeal among adults who have played instant lottery tickets within the past year.

Objectives

The primary purpose of this research project is to provide generalizable results regarding the initial appeal of potential instant ticket concepts priced at \$1, \$2, \$3 and \$5 among past month and past year players of instant tickets. The knowledge gained from the results of such research will provide direction to the Lottery regarding ticket concepts that will have the highest potential for player trial. Specifically, the research objectives include:

- The development of a reliable survey instrument that permits the classification and basic profiling of past year instant ticket-playing adults with respect to their instant game preferences, recency of instant play, frequency of instant play, monetary value of instant play, and other attitudes regarding the instant product.
- Sampling design that maximizes participation of both heavier past-month instant players as well as more casual past-year players.
- Capture of other attitudes and preferences regarding instant tickets and other lottery products to provide additional bases of comparisons of survey results.

Methodology

GPC desires to engage in quantitative research that measures the relative appeal (by ticket price point) of potential instant ticket concepts that the Lottery is considering for release into the marketplace. To this end, GPC wishes to employ an Internet-based methodology to present computer-based graphical representations of new instant ticket concepts to adults of age eighteen and older in order to measure the relative appeal of the new concepts. Suppliers’ methodological recommendations as well as a description of how they will execute their methodology in a timely and cost-effective manner are sought in their responses to this proposal request.

The Lottery intends to test concepts at the following price points and at the following quantities:

- \$1 – 8 concepts
- \$2 – 10 concepts
- \$3 – 10 concepts
- \$5 - 10 concepts

Included in their responses to the above-referenced research objectives and methodology, Suppliers are requested to address the following:

- Sample size and rationale. If the Supplier intends to use a third-party source for survey sample, please identify said source.
- The Supplier shall conduct the interviews, tabulate all data and provide GPC banners and an SPSS data file containing all individual survey item responses with each data field appropriately named and labeled with the item subject matter. Data coding rules shall be included as well.
- The Supplier shall be available for consultation with GPC and the Lottery either via conference call, 'webinar' or at Lottery headquarters for purposes of instrument design and project planning.
- The survey instrument is to be pilot-tested on no less than twenty (20) respondents, prior to deployment of the survey.
- The Supplier shall be available for the presentation of concept test results, product and marketing implications and recommendations to both GPC and the Lottery. Presentation may be via 'webinar' or may be requested to be on-site at a location specified by GPC – most likely at the Lottery's headquarters.
- Supplier shall make available the final report(s) in both Portable Document Format (".pdf") and in either PowerPoint (".ppt") or Microsoft Word (".doc") format for Windows-based personal computers.
- The Supplier is encouraged to include in their proposal any value-added services beyond the minimum requirements above that they believe will enhance the research as proposed. Pricing for these value-added services, if greater than zero, should be included separately from the minimum project requirements above. Acceptance of any value-added services will be at the discretion of GPC. Acceptance of a bid for the minimum requirements above will in no way obligate GPC to accept any or all proposed value-added services.

DATA COLLECTION TIMELINE

The Supplier shall provide a detailed project timeline beginning with the earliest date at which the Supplier can begin the project through completion and delivery of the above-described deliverables.

PROJECT AWARD

GPC will award a purchase order for the work called for herein on the basis of knowledge and experience with similar research projects in the lottery and/or gaming industries, the methodology outlined for undertaking this work, and price. All findings and work product produced by Supplier in connection with this research project will be deemed proprietary information of GPC. GPC expects the project to be completed on time and to its sole satisfaction; any delays must be communicated to GPC in writing to be considered for approval.

The information contained in this Scope of Work is not intended to be all inclusive and should serve only as the preliminary basis for developing your response. Any and all information identified herein is subject to change, with or without notice, at the request of GTECH or the Texas Lottery. A non-stop flight between GPC and the destination location is strongly recommended. GPC is to be notified of all flight information including flight numbers, departure and arrival times at all destinations.
- **Sea freight:** When a sea vessel is used to transport GPC products or components, the goods must be secured in locked and sealed sea containers. The sea container must be road transportable and able to be transferred to the sea vessel without compromise.
- **Vehicle:** The vehicle transporting GPC products must be under control at all times and never will be left unattended during the trip. GPC requires the same driver until the shipment reaches its final destination. At no time will a different driver resume the transportation of goods. The vehicle must be equipped with a telephone or other mode of communication that enables the vehicle to be in contact with a dispatcher and/or GPC security at all times. Vehicles must be exclusive use for all deliveries, and must be locked and sealed at all times. At no time during the transportation shall any trailers or cabs be changed. Before arrival at GPC facility, the carrier must provide the name and drivers license number of the driver(s) responsible for transporting goods to their final destination.
- GPC will provide all locks and seals to be used. All shipping documents will contain the seal number(s), total number of items, containers and pallets, but will not bear any reference to the type of material delivered, except in general terms sufficient for freight rating and customs purposes. GPC will submit duplicates of all shipping documents containing this information to the consignee. **No seal will be broken** except in case of emergency and GPC Security must immediately be notified should such event occur. GPC may provide transporters with a spare lock and seal to be utilized should a controlled breach occur during transit. Should such an event occur, GPC Security will be notified immediately and the transporter will annotate all shipping documents to reflect the replacement lock and seal number.
- GTECH Printing Corporation requires carriers to carry liability insurance covering GPC products for the above risks, taking into consideration the nature and volume of the product being transported. In that regard, Carrier's Motor Cargo Insurance coverage in an amount not to be less than \$250,000 per occurrence highest likely value of a truckload or multi-load shipment.

In accordance with Texas Gov't Code, Chapter 2161, each state agency that considers entering into a contract with an expected value of \$100,000 or more shall, before the agency solicits bids, proposals, offers, or other applicable expressions of interest, determine whether subcontracting opportunities are probable under the contract. In addition, the respondent must provide notice of each of its subcontracting opportunities to minority/women trade organizations or development centers at least seven (7) working days prior to submitting its bid response to the contracting agency.

We respectfully request that vendors interested in bidding on the subcontracting opportunity identified in **Section C** reply no later than the date and time identified in **Section C, Item 1**. Submit your response to the point-of-contact referenced in **Section A**.

In addition, the respondent must provide notice of each of its subcontracting opportunities to minority/women trade organizations or development centers at least seven (7) working days prior to submitting its bid response to the contracting agency.

We respectfully request that vendors interested in bidding on the subcontracting opportunity identified in **Section C** reply no later than the date and time identified in **Section C, Item 1**. Submit your response to the point-of-contact referenced in **Section A**.
